NOTE:
The hotel tiering system is a reference system developed by the Singapore Tourism Board (STB) to categorise the different hotels in Singapore into tiers based on a combination of factors that include average room rates, location and product characteristics.

Figures for the hotel industry are preliminary estimates, based on returns as at 28 September 2020. The current hotel tiers published are based on the hotels’ performance in 2019. The response rate across the tiers may vary. These figures exclude government-related transactions for COVID-related uses.

Luxury – includes hotels in the luxury segment and are predominantly in prime locations and/or in historical buildings.

Upscale – includes hotels in the upscale segment and are generally in prime locations or hotels with boutique positioning in prime or distinctive locations.

Mid-Tier – hotels in the mid-tier segment and are primarily located in prime commercial zones or immediately outlying areas.

Economy – includes hotels in the budget segment and are generally located in outlying areas.
